PROFESSIONAL PROFILE

UX/UI Designer with experience in startup environments and digital product development for companies in consumer goods, healthcare, technology, and innovation. I have worked on user-centered experiences for SaaS platforms, web and mobile applications, including mental health apps and clinical management software. I specialize in creating intuitive and visually appealing interfaces, always prioritizing usability and product consistency.

I have a B2 English level and work with methodologies such as Design Thinking for defining structures, wireframes, and interactive prototypes, using collaborative tools like Figma, Adobe Suite, and Miro. I am currently seeking new challenges as a UX/UI Designer, aiming to continue adding value in the creation of innovative products.

PROFESSIONAL EXPERIENCE

Inui, UX/UI Designer

Aug 08.2023 – Present

Responsibilities:

- Lead UX consulting processes to identify improvement opportunities in the user experience of digital products and operational processes related to clinic services, with a focus on the real needs of both internal and external users.
- Redesign the Meditat clinical management SaaS platform, which centralizes clinical operations (scheduling, care, medical records, billing, etc.), optimizing workflows for clinical and administrative teams.
- Design and prototype the mobile app *TeBo*, focused on mental health, aimed at supporting therapists and accompanying users through their therapeutic progress.
- Plan and execute usability tests, and analyze quantitative and qualitative data to identify friction points and areas for improvement.

Achievements:

- Identified critical points in operational processes that, once optimized, contributed to the clinic's overall efficiency.
- Reduced operating times for the clinical and administrative team through interface and flow improvements.
- Implemented usability and design enhancements in both the management software and the mobile app, increasing clarity and effectiveness for professional users.
- Collaborated with the multidisciplinary team to define flows and functional proposals currently under development, laying strong foundations for more efficient and user-centered products.

Bavaria (Cervecería del Valle), Freelance Digital Designer

Oct 10.2022 – Apr 04.2023

Responsibilities:

- Design and develop improvement projects for the brewery's communication channels, including web page design and creation of information channels.
- Organize and structure content in existing communication channels to enhance user experience and access to relevant information.
- Create engaging and high-quality multimedia content to support engagement, development, and training, ensuring effective communication with clients and employees.

Achievements:

- Co-designed 100% of the brewery's internal communication manual, positively impacting the reorganization of information across the plant, aligned with the annual communication plan.

- Fully implemented the annual communication plan, ensuring effective information flow across the plant and administrative teams, improving internal communication and decision-making.
- Redesigned the training and development plan through updated and dynamic multimedia content, significantly enhancing the user training experience.
- Collaborated with the team to design and launch an internal communication campaign highlighting the company's values and culture, fostering a stronger sense of belonging and engagement among employees.

Bavaria (Cervecería del Valle), Communications Designer & UX Researcher

Feb 02.2022 – Aug 08.2022

Responsibilities:

- Conduct in-depth analysis of the user experience for logistics operators and administrative staff to identify improvement opportunities in the area's visual management.
- Design high-quality graphic and multimedia content for internal and external audiences to ensure effective and attractive communication.
- Conceptualize and redesign physical spaces and brewery machinery using design principles to enhance functionality, ergonomics, and aesthetics, optimizing processes and user experience.

Achievements:

- Created a prototype for redesigning 80% of the logistics area, applying user-centered design principles aligned with the company's corporate visual standards.
- Led and developed improvement projects that positively impacted key KPIs in 2 of the 6 core areas of the company, including management, engagement, and implementation of the 5S methodology.
- Implemented digital communication strategies and actions that improved communication effectiveness by 80% between key departments.
