PROFESSIONAL PROFILE

UX/UI Designer with 3 years of experience working in startups and corporate environments, focused on user-centered digital products for healthcare, technology, consumer goods, and innovation sectors.

Experienced in UX research, interactive prototyping, information architecture, and SaaS and mobile app design. Skilled in improving digital experiences through usability testing, data analysis, and strategic design processes.

Strong knowledge of Design Thinking and agile methodologies, collaborating closely with multidisciplinary teams including product, technology, and business areas. Also experienced in using AI and automation tools to optimize UX research, documentation, and workflow processes.

Proficient with Figma, Miro, Notion, Jira, Adobe Suite, Lovable, and Front-End development fundamentals.

PROFESSIONAL EXPERIENCE

Inui, UX/UI Designer

Aug 08.2023 – Present

Responsibilities:

- Lead UX consulting processes to identify improvement opportunities in digital products and operational workflows.
- Redesign SaaS platforms focused on clinical management and administrative optimization.
- Create user-centered digital experiences through wireframes, interactive prototypes, and functional flows.
- Conduct UX research, usability testing, and qualitative and quantitative analysis.
- Collaborate with multidisciplinary teams to define strategic digital solutions.
- Implement AI and automation tools to optimize UX documentation and research processes.

Achievements:

- Reduced healthcare billing processes by 50% through workflow optimization and task automation.
- Automated UX research and design workflows, reducing execution time from one week to two days.
- Improved operational efficiency for clinical and administrative teams through usability and information architecture enhancements.
- Designed functional and visual improvements for tools used daily by professionals.
- Contributed to scalable and user-centered digital solutions alongside product and development teams.

Bavaria (Cervecería del Valle), Digital Designer (Freelance)

Oct 10.2022 – Apr 04.2023

Responsibilities:

- Designed digital solutions to improve internal communication and information access.
- Structured information architecture and navigation flows for internal platforms.
- Designed interfaces, visual resources, and multimedia content aligned with communication goals.
- Identified operational pain points and improvement opportunities through user analysis.
- Optimized internal communication processes using digital tools and automation.

Achievements:

- Helped design the brewery's internal communication manual, reorganizing critical information and improving accessibility.
- Improved internal communication flows between operational and administrative teams.
- Redesigned training experiences using interactive multimedia content to improve process adoption.

Bavaria (Cervecería del Valle), Designer & UX Researcher

Responsibilities:

- Conducted UX analysis for logistics operators and administrative staff to identify operational improvement opportunities.
- Designed visual and functional solutions for physical spaces, signage, and information flows.
- Conceptualized physical spaces and machinery using user-centered design principles to improve ergonomics and functionality.

Achievements:

- Designed a visual and operational transformation proposal for approximately 80% of the logistics area.
- Led improvement initiatives focused on visual management and 5S methodology.
- Developed visual communication strategies that improved information clarity and effectiveness.

EDUCATION

We are Shifta - Universidad Elisava

Front-End Development for Designers. May 05.2025 - Nov 01.2025

Coursera

Google UX Design Certificate Abr 04.2023

Icesi University

Industrial Design. Ago 08.2017 - Ago 08.2022

SKILLS & TOOLS

UX design, UI design, Design Thinking, Arquitectura de Información, Wireframing & Prototipado, Design Systems, Usabilidad, Investigación de Usuarios, Figma, Miro, Claude, Lovable, Notion, Jira, Análisis de experiencia de usuario, Gestión de proyectos, Metodologías ágiles, Desarrollo Front-End.
